

ACQUIRE 2.1.7 RELEASE NOTES

Release date: July 22, 2024

Build version: 2.1.7

This document describes the main fixes and improvements of Acquire version 2.1.7 published in July 2024.

System requirements

Acquire 2.1.7 is compatible with PANTHER 2 and all PANTHER units under subscription plan. See the PC requirements at the end of the document.

Main fixes and improvements

- Panther 256:256 configuration fixed
- Improved TCG assistant for TFM
- Sliding aperture for TFM and ATFM
- Sampling frequency is saved with the application

Modifications of existing features

- License manager updated to v9.16

Compatibility

- Files produced with older versions of Acquire remain compatible with Acquire 2.1.7
- Acquire 2.1.7 data files are compatible with Capture version 4.1.x

Known issues

- Due to the Motion improvement, trajectories could have to be reset

PC requirements

To run Acquire 2.1.7 with a PANTHER unit, optimal PC requirements are as follows:

- Windows 10 (64bits) or Windows 11
- Processor: Intel Core i7 or Intel Core i9
- GPU: NVIDIA GeForce from RTX 1000 to RTX 4080 (or industrial Nvidia equivalent)
 - Required driver version: 452.39 (more information on <https://www.nvidia.com/Download>)
- RAM: 32GB, 2x16GB, DDR4, 3200MHz
- Disk: SSD, 1To, NVMe

- USB: USB-A 3.0 (equivalent to USB-A 3.2 Gen 1)
- Optic fiber / ethernet 10GB/s:
 - On laptop: USB-C 3.2 Thunderbolt 4.0.
 - On desktop: Slot PCIe x8
