M2M CAPTURE SOFTWARE VERSION 3.1.9

HOTFIX INFORMATION

Main fixes and optimizations between Capture v3.1 and Capture v3.1.9

- Random FPGA connection loss
- Software endurance reinforced- limited memory consumption after hours of continuous use
- Latencies in the Home panel when many app/data files are stored
- Possibility to set gates outside the range – field colour indication added in the gate panel
- Max. length of pipe increased to 30m (~1181 in)
- Zero calibration UT scale correctly converted if shear waves
- D-Scan view not available during inspection
- Random artefacts displayed when refreshing views in analysis
- Reboot of Capture blocked at step 2/4 or 4/4

New features

❖ New Capture version management embedded allowing to:

- Check versions installed on the machine
- Remove previous versions
- Upgrade/downgrade between compatible versions (lowest version accessible: 3.1.4)

Information: version upgrade button now located in the *System information* panel (Gekko/Mantis info button located in the top banner of the Home page)

❖ M-skip export:

- Data text export compatible with NTPLOT (ESR Technology's M-skip software)

Information: the former txt export mode, named 'Cap', still available.

Known issues

- FMC recording limitation (if snapshot recorded, need to open a probe or specimen cal. wizard to get signal back)
