

HOTFIX INFORMATION

Capture software version 4.0.2

Main fixes and optimizations between Capture v4.0.1 and Capture v4.0.2

- Default emulated system on PC changed, fixing launcher instabilities
- Missing data after data files merge
- 2nd synchronized gate display issue
- German translation update

Known issues

- Data missed when changing gain during scanning
- Slow delay law computation for TFM with 5T and 5L modes
- Panther limitations (ATFM mode disabled, wrong max scan speed information)
- Wrong depth color palette scale for C-scan G2-G1 without synchronized gate
