

Sonyks™ 1.3R3 Release Notes

Released on: May 27, 2025

New Features and Improvements

- Introduced Connectivity menu, regrouping a set of new functionalities:
 - Automatically backup data to a Microsoft OneDrive account
 - Share screen via Zoom and enable remote control
 - Use Eddyfi mobile app to add notes and photos to the instrument.
- Introduced option to activate licenses for secure workspace environments with no internet access, such as air-gapped systems.
- Introduced option to export acquired data in CSV format.
- Updated descriptions of defects following changes to guided wave testing standards.
- Added list of recent operator names.
- Added support for new permanent collar models (rangePIMS).
- Added firmware support for new Guided Wave Phased Array (GWPA) plate probes.

Resolved Issues

- Allow access to Get Assistance when no files are present.
- Fixed many bugs if the A-Scan is in Time Corrected Gain mode.
- Fixed formatting of A-Scan abbreviated labels.
- Fixed bug in A-Scan when using the Measure tool.
- Fixed intermittent Pipe Diagram exception when scrolling near the edge of the screen.
- Fixed desynchronization between analysis diagrams when taking a screenshot.
- Fixed exceptions when trying to delete screenshots.
- Fixed typo in the report.
- Fixed crash when changing the root directory in Sonyks CPN.
- Fixed crash when accessing Licensing or software updates after acquiring data.
- Reduced A-Scan saturation events early in the signal.
